

LEAP LEARNING LABS

- The educational solution for everyone

VISION

Fostering hope and
aspiration for all

THE LEARNING LAB

An innovative educational method using technology and hands-on games to enable children to learn how to learn, wherever and whoever they are in the world.

APPS

We have developed more than 300 educational apps covering logic, literacy and numeracy

The apps are arranged for each station with specific colours, and can also be downloaded from LEAP APPSTORE:

HANDS-ON GAMES

Our educational apps are combined with various hands-on games to give the children a complete learning arena.

We see that this approach to education is very efficient and some children crack the code of reading in a few weeks.

THE LEARNING LAB PACKAGE

Tablets + headsets, pre-installed with about 200 apps, formatted for each station with a custom launcher app to prevent the students from accessing anything else on the tablet.

Hands-on games (puzzles, spelling games etc), banners and station cards, app book and print-outs. Colourful mats for each of the nine stations.

Training manuals and videos.

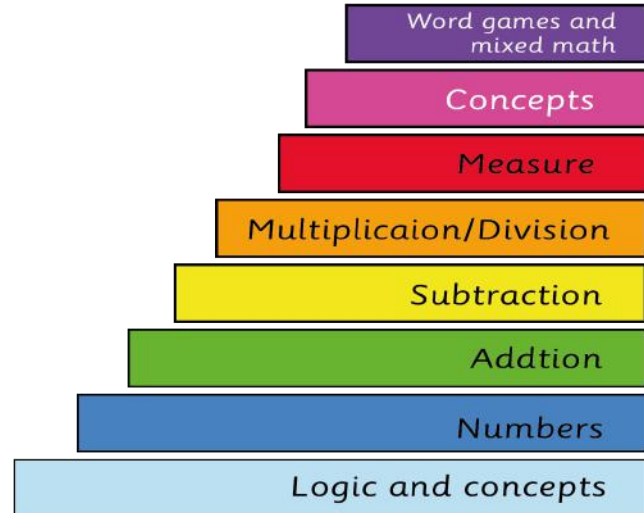

PROGRESSIVE LEARNING

For each station and topic, the children can learn at their own level and pace.

LITERACY

NUMERACY

Our proprietary technology, concept and method can easily be translated and adapted to various local contexts and languages fitting all age groups.

We have hands-on experience by working out in the field for several years developing and promoting technology in education.

The Leap Learning Lab is a revolutionary and cost-effective plug and play solution solving the different and varying educational challenges all over the world.

Our solution requires no internet, and is suitable in areas with unstable power supply.

KEY ASPECTS

Lifelong
learning
based on
foundational
skills

Focusing on
critical
thinking

Child-focused
learning so
each child
should feel
mastering

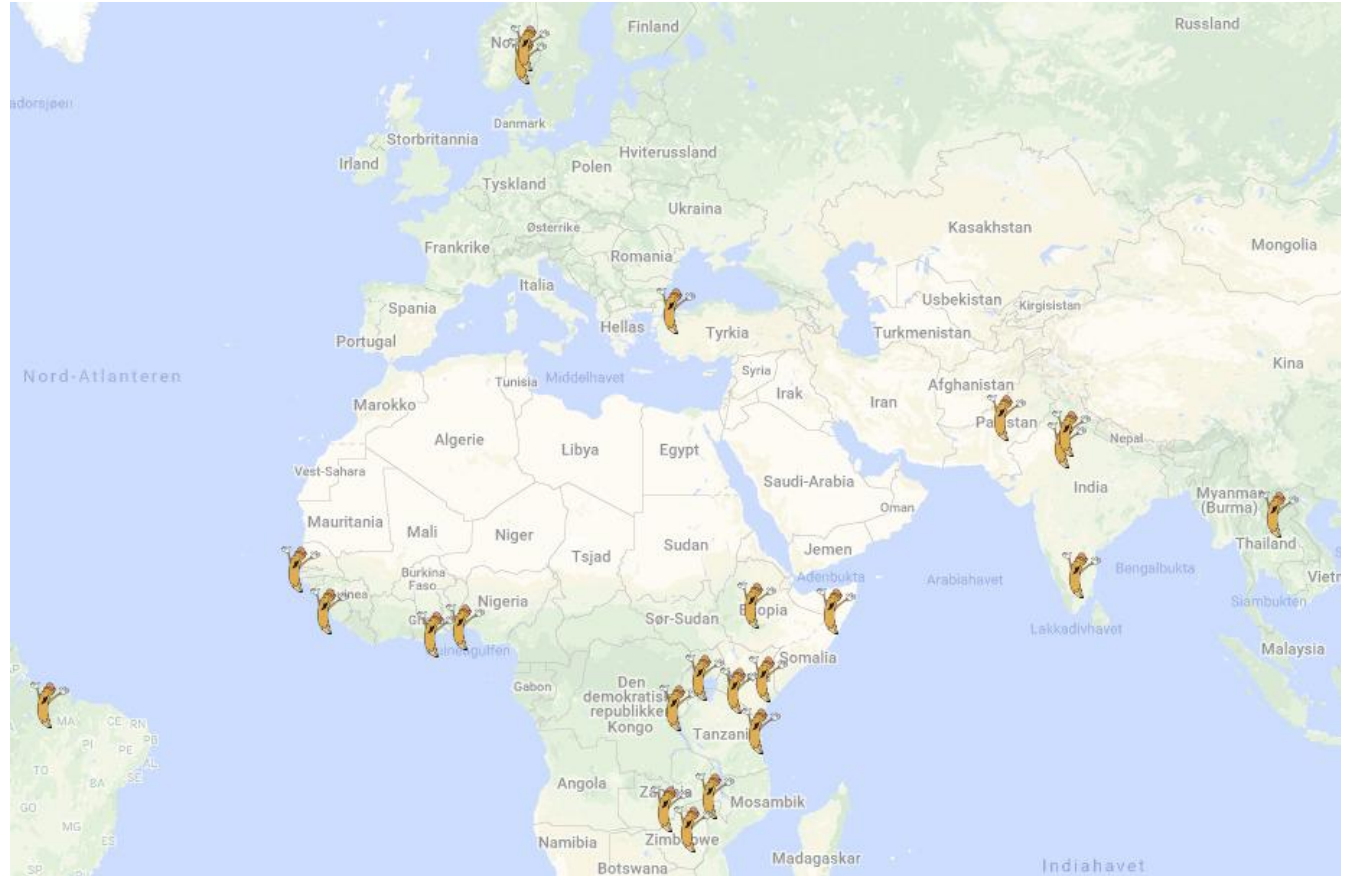

Learning how
to learn,
combining
technology
and hands-on
games

GLOBAL

There are Leap Learning Labs in over 17 countries in Asia, South America, Europe and Africa.

The concept is translated to English, Chichewa, Somali, French, Portuguese, Norwegian, Swahili and Spanish, with more languages in the making.

FUN

The children are learning a lot, and at the same time they are having great fun!

HOTSPOT

We have preloaded a rugged tablet in a locked box, set up outside in a remote rural location, accessible to everyone, any time of the day or night Now in 7 countries with great response!

EMERGENCIES

In crises, it is of outmost importance for the children to have stable routines and a safe and good space to go to. The Learning Lab offers such an environment.

EXAMPLE OF SETUP

Learning Lab in a school or community building

EXAMPLE OF SETUP

Learning Lab in a tent

Can also be divided to:

1 room for literacy

1 room for numeracy

EXAMPLE OF SETUP

Learning Lab under a tree
